

Mahmudur Rahman Labib

Technical Support Engineer

✉ mahmudur.labib.rahman@gmail.com ☎ 01962181171 📁 Portfolio 🌐 LinkedIn 🏠 GitHub

PROFILE

Technical Support Engineer with hands-on expertise in **WordPress (core, themes, plugins, multisite)**, PHP customization, and server administration. Skilled at troubleshooting across the full stack - **Docker, Nginx, MySQL, Redis, SSL/TLS, DNS, and cloud hosting** to deliver smooth client experiences. Adept in log analysis, root-cause diagnosis, and optimizing performance under pressure. Strong communicator with experience guiding clients via **email, chat, and video calls**, ensuring satisfaction and long-term success. Passionate about open source, automation, and continuous learning.

PROFESSIONAL EXPERIENCE

Technical Support Engineer 01/2025 – present
weDevs 🏠 Dhaka, Bangladesh

- First-line technical support for SaaS WordPress products.
- Troubleshoot complex issues in **WordPress core, plugins, PHP, MySQL, caching, and hosting environments**.
- Guide clients via chat and email with clear, actionable solutions.
- Document fixes and contribute to internal knowledge base for faster resolution.

WordPress Engineer 06/2023 – 12/2024
XynosLab 🏠 Dhaka, Bangladesh

- Built and maintained **custom themes and plugins** in PHP, ensuring security and performance best practices.
- Supported clients in scaling **WordPress multisite setups**.
- Configured servers (Nginx, Redis, MySQL) and integrated **CI/CD pipelines** for deployments.
- Monitored uptime and performance, resolving incidents with minimal downtime.

WordPress Engineer 04/2022 – 05/2023
Freelance 🏠 Dhaka, Bangladesh

- Delivered tailored WordPress solutions for small businesses and individuals.
- Migrated websites across **AWS and DigitalOcean** environments.
- Set up SSL/TLS, DNS, and caching layers for improved performance.

EDUCATION

Bachelor of Science in Computer Science and Engineering 06/2022
University of Liberal Arts Bangladesh Dhaka, Bangladesh

PROJECTS

Self-Hosted Stack 🏠
Designed and deployed a self-hosted stack on DigitalOcean with Docker and Caddy, running 12+ services including WordPress (FrankenWP), Portainer, Jitsi, Linkwarden, Rocket.Chat, TeamSpeak, Vaultwarden, Vikunja, Netdata + Grafana for monitoring, and more.
